RODAN

REACH Statement 2026-1

RODAN Technologies A/S works to ensure compliance with the applicable requirements of Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), as amended.

As a manufacturer and supplier of cable assemblies and related products, we work with our suppliers to obtain and review relevant compliance documentation for the materials and components used in our products.

Substances of Very High Concern (SVHC) – Candidate List

As of 12 October 2026, ECHA's Candidate List contains 253 entries. The latest update was published on 4 February 2026. We monitor updates and assess their relevance together with our suppliers.Under REACH Article 33(1), suppliers of articles containing a Candidate List substance above 0.1% weight by weight (w/w) must provide recipients with sufficient information for safe use, including, as a minimum, the substance's name. This threshold applies to each individual article, including articles incorporated into assembled products. In case of such content is identified in an article we supply, we provide the required information to affected customers. The presence of an SVHC does not itself constitute REACH non-compliance where all applicable requirements are met.

Authorisation – Annex XIV

The Candidate List and the Authorisation List in Annex XIV are distinct. Uses subject to authorisation may only continue after the relevant sunset date if a valid authorisation or another applicable legal provision permits them. We monitor relevant changes and assess their implications for our materials and production processes.

Restrictions – Annex XVII

We monitor relevant amendments to Annex XVII and assess restrictions applicable to our materials, components and products, including concentration limits, conditions of use, applicable dates and exemptions.

Documentation and follow-up

Based on supplier declarations and information available at the date of issue, RODAN Technologies A/S has not identified non-compliance with applicable REACH requirements for the products we supply.If non-compliance is identified, we investigate with relevant suppliers, take appropriate corrective action and inform affected customers without undue delay. This statement does not replace required product-specific substance information and is reviewed following relevant regulatory changes or new supplier information.
