Company Profile

About Rosenberger

Rosenberger, a family owned company, is one of the world's leading manufacturers of impedance-controlled connectivity solutions in high-frequency, high-voltage and fiberoptic technology. Renowned companies in high-tech industries trust the precision and quality of Rosenberger products, e.g. mobile communication networks, data centers, test & measurement industries, automotive electronics, industrial and medical electronics, or aerospace engineering.

Worldwide, the Rosenberger group operates a global network of R&D, manufacturing and assembly locations as well as Rosenberger sales offices in Europe, Asia and North and South America where more than 10,000 employees develop, produce and sell our products.

Test & Measurement

Rosenberger is a dependable and renowned development partner in industrial measurement technology. The fact that we work with leading global companies from the electronic measurement technology field reflects the way that others trust our research and development, our high-quality manufacturing, and not least our customer-orientated "Made in Germany" service. Rosenberger provides customized solutions – cost-optimized and timely – from the initial idea right through to volume production.

Rosenberger develops and produces a comprehensive range of cost-effective, high-quality and high-precision test & measurement products and services – microwave measurements & VNA calibrations, lab and factory testing, semiconductor test applications, PCB connections or network testing.

Solderless PCB Connectors – up to 110 GHz

Rosenberger provides a wide product range of solderless PCB connectors for challenging test & measurement demands. These PCB connectors can easily be assembled by using screws.

The product spectrum includes:

- Economic solderless PCB connectors for standard applications with frequencies up to 70 GHz
- High-performance solderless PCB connectors for frequencies up to 110 GHz
- Test PCBs, assembled with two PCB connectors

Economic Solderless PCB Connectors

For a variety of standard applications Rosenberger has developed cost-effective, economic solderless PCB connectors. These straight connector types are designed to provide low return loss values for frequencies up to 70 GHz.

Economic solderless PCB connectors from Rosenberger can be easily mounted by using screws. Standard screws for a PCB thickness of maximum 2.5 mm are included, optional screws for thicker PCBs are available on request. Their mode-free design allows very good RF performance for standard applications in the fields of test and measurement, chip testing fixtures, board characterization or communication industries.

Product Features

- PCB connection – no soldering required
- RPC-1.85, RPC-2.40, RPC-2.92 and RPC-3.50 interfaces available
- Cost-effective connectors
- Mating cycles interface ≥ 500
- Mating cycles PCB side ≥ 300 (typical)
- Reduced installation time
- For frequencies up to 70 GHz
- Universal, robust and reusable

High-Performance Solderless PCB Connectors

For high-performance applications Rosenberger has developed solderless PCB mount connectors. These 30° angle connectors are designed to provide low return loss values for frequencies up to 110 GHz – for single-layer or multi-layer printed circuit boards where the microwave layer is on the top.

Solderless PCB mount connectors from Rosenberger can be easily mounted by using screws and pre-positioning dowel pins. Screws for a PCB thickness of maximum 1.5 mm are included. The dimensions are expandable by using longer screws. Their mode-free design allows excellent RF performance for high performance applications in ultra-high frequency test and measurement applications, applications where minimum radiation and coupling to adjacent circuitry is mandatory or test fixtures and board characterization.

Product Features

- PCB connection – no soldering required
- Prepositioning enforced by dowel pins
- Clamping mechanism accommodates a wide range of board thicknesses while providing a continuous ground connection between contact area and circuit board
- Universal, robust and reusable
- RPC-1.00, RPC-1.35, RPC-1.85 and RPC-2.92 interfaces available
- Mating cycles interface ≥ 500
- Mating cycles on PCB side ≥ 300
- For frequencies up to 110 GHz
